Concrete Admixtures Catalog - Sidley Chemical

Powder Water-Reducers Admixtures

| PRODUCT FAMILY | ТҮРЕ | CODE | FEATURES AND RECOMMENDATIONS | DESCRIPTIO N | STANDARD | Benchmarking product |
|----------------------------------|----------|--------|-------------------------------------------------------------------------------------|-----------------|-------------|----------------------|
| | PCE104P | SD0077 | PCE powder for gypsum | Powder | | |
| | PCE128P | SD0166 | PCE powder for grouting material | Powder | | |
| | PCE802P | SD0011 | PCE powder for self-leveling mortar | Powder | | Sika 540P |
| | PCE906P | SD0076 | PCE powder for uhpc | Powder | EN934-2:T3 | Sika 540P |
| | PCE154F | SD0163 | Flake water reducer, high solid content, easy to store, high range water reducer | Flake | | |
| Water- Reducers Admixtures | PCE155F | SD0164 | Flake water reducer, high solid content, easy to storehigh slump retention | Flake | | |
| Aumixtures | PCE 157P | SD0165 | Highly slump retention, 6-9 hours of ultra long collapse protection time | Powder | | |
| | SL50P | SD0168 | Sodium lignosulfonate | Powder | FNI024 2 T2 | |
| | CL50P | SD0167 | Calcium lignosulphonate | Powder | EN934-2:T2 | |
| | SMF10P | SD0075 | Powder melamine formaldehyde sulfonate | Powder | | |
| | SNF05P | SD0088 | Naphthalene sulfonate | Powder | EN934-2:T3 | |
| | SNF18P | SD0089 | Naphthalene sulfonate | Powder | | |

Mother Liquor PCE

| PRODUCT FAMILY | ТҮРЕ | | FEATURES AND RECOMMENDATIONS | DESCRIPTIO N | STANDARD | Benchmarking product |
|----------------------|---------|--------|------------------------------------------------------------------------------------------------|-----------------|------------|---------------------------------|
| | PCE150L | SD0107 | Mid-water-reducing,High solid content, 70% | Liquid | EN934-2:T3 | SIka Viscrete 3301M (MR-1) |
| | PCE152L | SD0161 | Ultra high water reduction rate≥45%, Exhibit excellent performance in early strength growth | Liquid | | SIka Viscrete 3301HH (WR-4) |
| | PCE154L | SD0106 | Ultra high water reduction rate mother liquor, highly water-reducing | Liquid | | SIka Viscrete 3301MK (PC7.5) |
| HIGH- RANGE,WATER | PCE156L | SD0109 | Mid-slump retentionmid-water-reducing | Liquid | | SIka Viscrete 3301MH (PC5.5) |
| -REDUCERS | PCE155L | SD0108 | Slump retention | Liquid | | SIka Viscrete 3301MU (PC6A) |
| | PCE157L | SD0110 | Adjust the workability of concrete, highly slump retention | Liquid | | SIka Viscrete 3301LS (SK67) |
| | PCE159L | SD0162 | Super early strength polycarboxylate high-performance water reducer | Liquid | | SIka Viscrete 20HE (WR-9) |

Functional Water-Reducers

| PRODUCT FAMILY | ТҮРЕ | | FEATURES AND RECOMMENDATIONS | DESCRIPTIO N | STANDARD | Benchmarking product |
|------------------------------|-------------------|--------|-----------------------------------------------------------------------------------------------------------------------|------------------------------------|----------|-------------------------|
| normal Water- reducers | NWR50 | SD0143 | For lower strength concrete | Naphthalene sulfonate- based | | |
| | Ment NS | SD0145 | For Ready-mixed concrete, Small precast concrete products, Prestressed Concrete Cylinder Pipe(PCCP), Concrete pile | Naphthalene | | |
| MId-Range | Ment NS Powder | SD0144 | For Ready-mixed concrete, Small precast concrete products, Prestressed Concrete Cylinder Pipe(PCCP), Concrete pile | sulfonate- based | | |
| WATER- REDUCERS | Ment NS95 | SD0146 | Superplasticizers for Roller Compacted Concrete(RCC) | | | |

| | PCE1015L | SD0160 | Mid-range water-reducing admixture for ready-mixed concrete. | polycarboxylat | | | |
|----------------------|----------|--------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|---------|---------------------------------------|---------------------|
| | PCE1025L | SD0158 | Water-reducing admixture for industrial concrete floor slabs with power- floated finishes | e ether-based | | | |
| | PCE1016L | SD0159 | Superplasticizers for Aerated Autoclaved Concrete (AAC) | | | | |
| | PCE1026L | SD0157 | Superplasticizers, ready-mixed concrete, concrete for infrastructures | | EN934-2 | MasterEase 3820 SIka Viscrete 3110 | |
| | PCE1036L | SD0156 | Superplasticizers,Good retarding time for Mass Concrete(MC) | | | | |
| | PCE1046L | SD0155 | Superplasticizers, Self-compacting concrete, Concrete with long delivery times (superior slump retention) concrete in hot climates, 6-9 hours of ultra long | | | Sika ViscoCrete® SC-403 | |
| | PCE1056L | SD0154 | Superplasticizers for low clinker concrete production | | | | MasterCO2re 3700 |
| HIGH- RANGE,WATER | PCE1066L | SD0153 | Superplasticizers for industrial concrete floor slabs with power-floated finishes | polycarboxylat | | MasterFinish SLB 101 | |
| -REDUCERS | PCE1076L | SD0151 | Superplasticizers concretes containing challenging sands such as those containing swelling clays. | e ether-based | | MasterGlenium SKY 925 | |
| | PCE1085L | SD0150 | Self-compacting super plasticiser for use in GRC and precast concrete | | | | |
| | PCE1086L | SD0149 | Superplasticizers, high early strength for Shotcrete or Precast concrete (Large box girders or T-beams used for railway or highway bridges) | | | MasterCO2re 5700 | |
| | PCE1096L | SD0152 | Superplasticizers, High performance for UHPC | | | | |
| | PCE20SL | SD0147 | Superplasticizers, Operational time 8-12 hours excellent slump retention ability for top lifting method for construction of steel pipe arch or steel pipe column | | | Slka Viscrete 3301C | |
| | PCE20SP | SD0148 | Superplasticizers, high early strength for precast subway pipe segments concrete or Tunnel segments | | | SIka Viscrete 20HE | |
| | | | Function Additives | <u> </u> | | | |

FEATURES AND RECOMMENDATIONS

product

Dosage

N

FAMILY

TYPE

| VISCOSITY MODIFYING AGENTS | VMA | SD0111 | Application area: SCC, Manufactured Sand Concrete, Low binding material concrete.Improving the flowability and stability of concrete by improving the performance of concrete slurry rather than increasing the amount of cementitious materials used | Liquid | 3-8kg/t | BASF 420 |
|--------------------------------------------------|---------------|--------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|------------------------------------------------------|--------------------|
| | LV1 | SD0112 | Application area: High-strength concrete, Concrete with high viscosity, Low slump pumping concrete. By reducing the viscosity of concrete, improving its workability and flexibility, it facilitates the pumping and construction of concrete. | Liquid | 40-100kg/t | |
| , (GEIVIS | Stabilizer 5R | SD0113 | Application area :Low binding material concrete, Artificial sand concrete, Ultra- | Liquid | 20-50kg/t | Sika Stabilizer 4R |
| | Stabilizer 7R | SD0114 | fine sand concrete, Discontinuous graded coarse aggregate concrete. By increasing the viscosity or air content of concrete, improving its workability, enhancing its wrapping properties, and avoiding segregation and bleeding. | Powder | 10-30kg/t | |
| | Stabilizer 9R | SD0115 | enhancing its wrapping properties, and avoiding segregation and bieeding. | Powder | 0.5-2kg/t | |
| | SG100 | SD0085 | Sodium gluconate | Powder | 5kg-100kg/t | |
| | TCD98 | SD0084 | Anhydrous Sodium Citrate | Powder | 5kg-100kg/t | |
| SET- RETARDING AND HYDRATION CONTROL | RETARD24 | SD0119 | It is a liquid concrete admixture mainly used for large volume concrete or conc rete projects with longer pouring times. When added with 2%, the initial and fin al setting time can be extended to 72 hours or more; After the initial setting del ay in the plan, the hardening speed accelerates without affecting the later deve lopment of concrete strength. | Liquid | 0.2 - 1.5 % | sika reatarded 25 |
| | RETARD96 | SD0120 | It is an active intervention aimed at the adiabatic temperature rise process of la rge volume concrete hydration, which can significantly inhibit the cement hydra tion process, delay the internal heating rate of concrete, reduce the hydration t emperature peak, and delay the appearance time of the temperature peak, eff ectively suppressing or reducing the temperature shrinkage cracks of concrete. | Liquid | 0.5-2.0% | |
| | SETPLUS | SD0116 | SEPULS is an engineered suspension of crystal seeds containing nanoparticles, designed to boost the hydration process of early age cement (6-12 hrs). | Liquid | 0.50 to 6.00 kg pe r 100 kg of cement (binder) | master x-seed 100 |

| STRENGTH- ENHANCING AND SET- | SET AC205 | SD0117 | SET AC205 ready to use, liquid admixture is formulated to accelerate time of setting and to increase early concrete strengths. SET AC205 admixture does not contain calcium chloride | Liquid | 0.5– 3.0 L/100 kg of cementitiousma terials | sika rapid-1 |
|------------------------------------|-----------|--------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|------------------------------------------------------|---------------|
| ACCELERATING | SET AC105 | SD0118 | SET AC105 readyto-use, liquid admixture isdesigned to make moreuniform and predictable qualityconcrete while accelerating setting time and strengthdevelopment. This product contains intentionally-added calciumchloride. | Liquid | 1-4 L/100 kg of cementitiousmater ials | |
| | AE180P | SD0189 | Sodium dodecyl sulfate | Powder | 5-400mls/m3 | |
| | AE185L | SD0190 | Rosin oligomer | Liquid | 20-400mls/m3 | |
| | AE190P | SD0191 | Triterpenoid saponin | Powder | 30-400mls/m3 | |
| | AE195L | SD0192 | Synthetic polyether | Liquid | 50-600mls/m3 | |
| AIR- ENTRAINING | Finish200 | SD0121 | Synthetic based AEA, controlled air entrainment, high quality air void system, i mproved concrete density and surface finish, for SCC or low- viscosity concrete | Liquid | 10-300 mL/100 kg cement | |
| | LWC10 | SD0060 | It is an aqueous solution based on sodium alkyl sulfate.It is used in gypsum wallboards. | Liquid | 0.02~0.10 % by we ight of stucco | Basf GYP 3110 |
| | LWC30 | SD0061 | It is designed to generate mid-coarse bubble to achieve light weight gypsum wallboard. | Liquid | 0.02~0.10 % by we ight of stucco | Basf GYP 3710 |
| DEFOAMER | DF130P | SD0124 | It is a special polyether defoamer. It is completely silicon free, has good defoa ming and foam suppression effects, good water solubility and dryness, strong a cid and alkali resistance, and can eliminate foam in various water- based systems. | Powder | 0.02-0.3% | |
| | DF230L | SD0122 | It is used to manufacture architectural quality concrete satisfying the requireme nt for a largely voidfree concrete surface. It is particularly suitable for SCC and f lowing concretes. | Liquid | 0.10 to 0.30 kg per 100 kg of cement (binder) | sika 753w |
| | DF330L | SD0123 | It is used to manufacture building grade concrete that meets the requirement of virtually no voids on the concrete surface. It is particularly suitable for SCC, P lain concrete, Mass concrete and Precast concrete. | Liquid | 0.10 to 0.30 kg pe r 100 kg of cement (binder) | |

| Surface Improving Admixtures | Finish RL99 | SD0129 | Ready-to-use Water emulsion form release agent for elements where excellent surface finish is important. | Liquid | 10-30 m2/kg | Sika® Separol® W-320 |
|------------------------------------|--------------|--------|--------------------------------------------------------------------------------------------------------------------------------------------------|---------------|----------------------------------------------------------|-----------------------------------------------|
| | Finish DF430 | SD0126 | Concrete defoamer for high- quality architectural concrete achieves a largely void-free surface in self- compacting and flowing concretes. | Liquid | 0.10 to 0.35 litres per 100 kg of cem ent (binder) | |
| | HC | SD0128 | Concrete curing agent to prevent the evaporation of moisture, allowing gases t o pass through and facilitate respiration. | Liquid | 4-5 m2/ltr. | Sika® Antisol® S IDROCRETE MN Mape Cure |
| | НСР | SD0127 | Surface enhancers can penetrate into concrete, enhance surface strength, and prevent water evaporation. | Liquid | 4–7 m2/l/coat | Sikafloor® CureHard-24 |
| | TARD-S | SD0125 | Surface retarder, retard set of surface mortar in concrete, suitable for exposed aggregate surface, prevent cold joints. | Liquid | 200 sq. ft. per gall on | |
| CORROSION | CIA24 | SD0130 | Dual action corrosion inhibitor, anodic and cathodic protection, reduced occurrence of corrosion, no calcium nitrite | Liquid | 10–12 kg/m³ | sikaferrogard 901s |
| INHIBITORS | CNI | SD0131 | CNI is a calcium nitrite-based corrosion inhibiting admixture containing a minimum of 30% calcium nitrite by mass. | Liquid | 10–12 kg/m³ | sika CNI |
| | SRA | SD0132 | Drying shrinkage reducing admixture, suitable for high performance concrete, | Liquid | 2.0-6.0 L/m3 | sika control 40/masterlife sra 25 |
| Shrinkage Reduction | SR-100P | SD0021 | reduces formation of cracks | Powder | 0.2 – 2.0% of cement (binder) | SITREN PSR 100 |
| | CRA | / | Plastic shrinkage reducer, reducing plastic shrinkage cracks | Powder/Liquid | 5.0-10.0 L/m3 | MasterLife CRA 007 |
| WATER-TIGHT APPLICATIONS | WT50 | SD0133 | Integral watertight admixture, reduces water absorption and water penetration under pressure | Liquid | 1.0-2.0% of cement (binder) | MasterPel 240 |
| | WT100P | SD0134 | Integral crystalline admixture, reduces water absorption and water penetration under pressure. | Powder | 3.75kg/m3 | Sika WT-200 P |
| | STF LH | SD0138 | End hook type STF | Steel Fiber | | |

| | STF BCM | SD0137 | Brass Coated Micro Steel Fiber type STF | Steel Fiber | | |
|--------------------------|---------|--------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|------------|--|
| | PPMF | SD0136 | Polypropylene Macro Fiber(PPMF) | Synthetic fibre | | |
| | PPSF | SD0135 | Polypropylene Mesh Fiber(PPSF) | Synthetic fibre | | |
| FIDED | PPCF | SD0062 | Polypropylene Chopped&Monofilament Fibre(PPCF) | Synthetic fibre | | |
| FIBER | PVAF | SD0194 | polyvinyl alcohol Fiber | Synthetic fibre | | |
| | PANF | SD0195 | Polyacrylonitrile Fiber | Synthetic fibre | | |
| | PESF | SD0196 | Polyester Fiber | Synthetic fibre | | |
| | CLF | SD0197 | Cellulose Fiber | Cellulose Fiber | | |
| | GF | SD0198 | Glass Fiber | Glass Fiber | | |
| | SA06 | SD0173 | Alkali-free liquid set accelerator, chloride-free | Liquid | 5.0-10.0% | |
| SHOTCRETE ACCELERATOR | SA06MP | SD0193 | The use of SA06MP and aluminum sulfate compound to SA06 finished accelera tors does not require heating. Water is added for physical stirring at room tem perature and pressure. The compounding method is simple and can significantly reduce the cost of end products. | Powder | | |
| Expansion agent | EA25P | SD0030 | Magnesium oxide expansion agent, Ensure micro expansion of concrete in the later stage | Powder | 10-40kg/M3 | |
| SILICA FUME | Fume | SD0174 | Silica Fume can replace cement in excess, ensuring the strength of concrete while providing better workability and construction performance | Powder | 10-20kg/M3 | |
